

The Power Of Writing

It must be noted, I am not a professional or literate writer.

I simply write without fears or handcuffs as a vehicle of expression while attempting to encourage others to do the same as a better option to avoid violence.

I'll encourage you to not only write, but I'll encourage you to encourage others to write as well.

One simple way we can accomplish this process is via your social media likes, tags and reposts.

Simply put some of our riches reside with what we write. Be it music, raps, various other songs, books, poetry, diaries, essays, etc.

The treasures we write will be here long after we are dead and gone.

Simply write to let the world know the quality of your person for the here and well after.

Photos are one thing but your words introduce an ingredient of you.
